

An internet we trust
Exploring reliability in the online world

**Safer
Internet
Day 2021**

Celebrating Safer Internet Day : Tuesday 9th February 2021

This year in the UK, Safer Internet Day explores reliability online. The campaign focuses on knowing what to trust online and supporting young people to question, challenge and change the online world. The internet has an amazing range of information and opportunities online, and can help us see the world from different points of view. But how do we separate fact from fiction, the genuine from the misleading? How do we decide what to believe online, and what's the impact of dealing with fake content and experiences online? Join us this Safer Internet Day in helping to create an internet we can trust.

Dear parents and carers ,

We would be delighted if you could join us in celebrating the day by continuing the conversation at home. To help you with this, you may be interested in downloading the free Safer Internet Day Education Pack for Parents and Carers which is available at:

saferinternet.org.uk/sid-parents.

There is also a [quiz](#) and [films](#) which you can see at home with your child.

Thank you,

Yours sincerely

Mrs Chaudhuri

How we are celebrating Safer Internet Day with the children and parents through home learning:

We have planned some activities for all the classes from Nursery to Year 6.

The activities for each class will be posted to class Padlets on 9th February.

Activities for **Nursery to Year 3** are mainly based on the story 'Digiduck Detective'. <https://www.childnet.com/resources/digiduck-stories/detective-digiduck>

Activities for **Year 4 to Year 6** are based on Safer Internet Day films for 7-11 year olds , saferinternet.org.uk/films and Purple Mash activities.

Top tips for parents / carers

1. Parents' ultimate guide to parental controls

Why do we use Purple Mash at Raddlebarn Primary School?

At Raddlebarn we use Purple Mash, which is an award-winning website for early years and primary school children. It enables children to explore and enhance their Computing knowledge in a safe, fun and creative way.

It has been a very useful tool to establish a meaningful, productive cross-curricular link between the teaching of Computing and other subjects.

As Purple Mash is online, children can continue their learning anywhere and anytime. Each user receives an individual login and password to save and retrieve their work.

Also, children can share their creative work and expertise to the wider audience in school and with members of their family.

Taught with Purple Mash throughout the year, online safety is a key part of the curriculum in each year group in our school.

We have been very successful using Purple Mash, not only for teaching Computing, but also for remote online learning.

Tips for parents/carers
